SPECIFICATION AMENDMENTS

Please cancel the amendment to page 7, second paragraph submitted by
Amendment filed 08/22/05 and substitute therefor the following:

“Preferred monohydric aralkyl alcohols of the invention are those having formula
I below:

in which R is a C₁-C₁₂ straight or branched chain, saturated or olefinically unsaturated alkylene group, and R¹ and R² are independently hydrogen, halogen, (fluorine, chlorine, bromine, or iodine), C₁-C₄ alkyl, or C₁-C₄ alkoxy groups. Preferred compounds of formula I are those in which the R group is a C₁-C₆ saturated alkylene group, especially those wherein R¹ and R² are both hydrogen. The most preferred compound of formula I is benzyl alcohol. When the R group is an ethylenically unsaturated alkylene group, this group can also be referred to as an alkylene group.”
